

Monthly Air Pollution Control Program Summary Report

Concerns Received or Investigated Between July 16, 2024 and August 15, 2024

Concerns Recieved During Report Period

	Total
Total	98
Asbestos	10
Fugitive Particulate Matter	8
Hazardous Air Pollutant Release	6
Odor	32
Open Burning	30
Other	10
Particulates	2

Number of Notices of Violation (NOV) Issued: 0

Number of Referral Notices of Violation (RNOV) Issued: 0

Number of Letters of Warning (LOW) Issued: 2

Concerns Investigated During Report Period

	Total
Total	92
Concerns Received Before Report Period	4
Concerns Received During Report Period	88

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern, therefore the totals listed here may not reflect the total number of concerns recieved during the reporting period.

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Monthly Air Pollution Control Program Detail Report

Concerns Received or Investigated Between July 16, 2024 and August 15, 2024

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58445	7/15/2024	7/17/2024	unknown	Bypass or Sewer Overflow Odor	/Benton	KCRO	KM	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		There is a pump station, west of the cove off the river below Truman Lake. The CP noticed that a strong odor is coming from the pump station yesterday. The CP has said that a white pipe comes from the pump station that has only discharged clear water in the past, but is not currently visible due to high water and trees.						
Conclusions:		Odor is likely due to typical wastewater treatment processes.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58467	7/15/2024	7/16/2024	OO Organics, LLC	Odor	Monett /Lawrence	SWRO	JW	Communication In Person
Concerned Party:		Kim Pearson						
Concern Info:		Caller states that a local food processor has recently ramped up production and the new food waste that is being brought in smells extremely bad. Caller is located NE of the plant and can smell it on days that winds prevail from the southwest. Caller would like informed of the results of the investigation.						
Conclusions:		SharePoint #10233. I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58469	7/15/2024	8/9/2024	Ken Ortsman	Open Burning	Lampe /Stone	SWRO	BD	Site Visit
Concerned Party:		Anonymous						
Concern Info:		RP called and stated that the Life Under Construction Boys Ranch is burning tires, furniture, plastics, and everything else that is donated that is not usable. The caller said that Ken Ortsman is the property owner at the moment. The caller said that the Ranch loves to use their religious exception to bypass laws.						
Conclusions:		SharePoint #10231. No open burning violations were observed during the tour of the property, and all trash generated on the property is being managed according to the requirements set in the Solid Waste Regulations.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58499	7/17/2024	7/26/2024	Rob Hunt	Open Burning Open Dumps:	Marshfield /Webster	SWRO	CR	Letter LOW
Concerned Party:		Anonymous						
Concern Info:		WEB FORM - Burning Building Materials						
Conclusions:		SharePoint #10247 An LOW has been issued to Rob Hunt for open burning violations and improper disposal of solid waste. The waste materials dumped and burned on the property included durable goods and construction and demolition waste.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58499	7/17/2024	7/26/2024	Rob Hunt	Open Burning Open Dumps:	Marshfield /Webster	SWRO	CR	Letter RTC
Concerned Party:		Anonymous						
Concern Info:		WEB FORM - Burning Building Materials						
Conclusions:		SharePoint #10247 An LOW has been issued to Rob Hunt for open burning violations and improper disposal of solid waste. The waste materials dumped and burned on the property included durable goods and construction and demolition waste.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58500	7/16/2024	7/26/2024	Isonova	Odor	Verona /Lawrence	SWRO	JW	Phone Conversation
Concerned Party:		Robert Jungbluth						
Concern Info:		Odor concern for Isonova - wind is coming from the north with a sour raw egg smell. Complainant is located south of the plant at Hwy P and FR 2190						
Conclusions:		SharePoint #10244 I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58508	7/18/2024	7/18/2024	LaPlata Special Road District	Fugitive Particulate Matter Hazardous Air	La Plata /Macon	NERO	SB	Communication In Person
Concerned Party:		Tonya Stanford						
Concern Info:		Email states, "My concern is about old hwy 63 where the asphalt road has been being graded and all that Silica dust that the residents are breathing in and the problems me and my husband have had since 2021 when it started. I understand OSHA has passed a law in 2018 for workers having to wear respirators when working around this dust. Also they have to vacuum instead of sweeping. We live on this road and breathe this daily!"						
Conclusions:		No violation of the fugitive dust rule was alleged. The specific concern was regarding silica dust being present in dust from a county road that formerly contained asphalt. The department does not have authority to address that concern.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58514	7/18/2024	7/24/2024		Open Burning	/Newton	SWRO	BD	Site Visit
Concerned Party:		Scott Feken						
Concern Info:		CP called in and stated that the property directly south of them has been burning copper wires, tires, and insulation from a mobile home that is on site. CP states that they are not burning today but they have been burning about twice a week for about a year. The owners of the property are George and Donna Martin however the people who are staying there are believed to be squatters. They have locked the gate when they burn so the fire department cannot gain access. They live in a big RV on site and the burn pile is on the back side of that. CP can see the burning from their property.						
Conclusions:		SharePoint #10273. No violations are currently being filed with the department.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58515	7/18/2024	7/19/2024	AFB International	Odor	/Lawrence	SWRO	JW	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Early in the morning as the caller is leaving for work, the caller says the smell outside is really bad. Caller states the smell is coming from AFB International. The caller states the smell can be so bad it almost makes him throw up. The caller notices this about 8 times a month.						
Conclusions:		SharePoint #10277. I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58521	7/18/2024	7/25/2024	Fathom Claxton	Open Burning	Camden Point /Platte	KCRO	DS	Site Visit
Concerned Party:		Laura Bailey						
Concern Info:		Neighbor one house up from me burns plastic on a regular basis out in the open right in their yard. They have been burning plastic for the past 6 years that I have lived here, and I suspect for many years before this. The smell is strong, toxic and permeates the air around my home as well as others. This cannot be good for the environment or air quality.						
Conclusions:		An onsite investigation was conducted. Areas of open burning were observed. The responsible party states that only household waste is burned. No evidence to the contrary was observed. No violations found.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58543	7/23/2024	7/24/2024	American Tripoli	Fugitive Particulate Matter	Seneca /Newton	SWRO	BD	Site Visit
Concerned Party:		Jerrod Eidson						
Concern Info:		Caller states that American Tripoli is fogging out the town at 11:15 a.m.						
Conclusions:		SharePoint #10322 No fugitive emissions were observed during the investigation.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58544	7/22/2024	8/6/2024	Phil Randazzo	Hazardous Waste Generators Open Burning	Osage Beach /Camden	SWRO	WH	Report
Concerned Party:		Anonymous						
Concern Info:		Received via webform: THE BUSINESS IS LOCATED AT 6164 OSAGE BEACH PARKWAY, Osage Beach, MO, 65065. WASTE OIL LEAKING ON THE GROUND. PAINT WASTE AND CONTAMINATION LEAKING ON THE GROUND. GROUND WATER CONTAMINATION. HAZARDOUS WASTE BURIED ON SITE. IMPROPER DISPOSAL OF FUEL AND WASTE OIL, PAINT WASTE, BATTERIES. BURNED FIBERGLASS BURIED ONSITE.						
Conclusions:		SharePoint #10313. Violations were identified. Please see the inspection report for the August 6, 2024 inspection of Haul It LLC for further details.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58546	7/21/2024	7/23/2024	Unknown	Odor	/St. Louis City	SLRO	RA	
Concerned Party:		Anonymous						
Concern Info:		Received an anonymous concern stating there is a Very strong chemical smell in the air in the city of St. Louis.						
Conclusions:		There were not enough details in the concern to conduct an investigation. CP was anonymous, so I could not contact them to get more details.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58547	7/23/2024	7/23/2024	Marketing.com	Hazardous Air Pollutant Release	/St. Louis	SLRO	RA	
Concerned Party:		Jacob Wagoner						
Concern Info:		Received an environmental concern from the EPA. The CP states, there is a printer company located next to a public elementary school. I have called my local building department and they confirmed this company is not permitted to release any exhaust from the roof. My local offices will do nothing to stop them from releasing toxic print exhaust onto the local residents and children. Facility has a RCRA compliance history (2022) under the name Cenveo/colorart.						
Conclusions:		Referred concern to St. Louis County Dept of Public Health.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58564	7/22/2024	7/26/2024	Isonova Technologies	Odor	/Lawrence	SWRO	JW	Phone Conversation
Concerned Party:		Willard Bontrigger						
Concern Info:		Willard Bontrigger called to report IsoNova odors at 6:30 a.m. on the morning of 7/22/2024						
Conclusions:		SharePoint #10330 I arrived to the region near the facility at 7:02 a.m. and I began the investigation by using the nasal ranger near the triangle intersection between P Highway and County Road 2170. It was 69 degrees F with 50% cloud cover, 99% humidity, and 3 mph SE winds. I noticed odors as I approached the intersection but I did not detect any 7:1 dilution-to-threshold odors with the nasal ranger. I drove west on County Road 2170 and turned south onto County Road 1135 until I was upwind of the facility so that I could reset my olfactory senses. After I connected to P Highway and drove north past the facility, I attempted another nasal ranger test at the same location at 7:21 a.m. The nasal ranger did not mark 7:1 detections. I ended the investigation and I left the region at 7:29 a.m. I left a voicemail for Dan Bowers on July 31, 2024 to announce the findings of my recent investigations. I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58570	7/22/2024		Good Day Farms	Odor Pesticides or	Columbia /Boone	NERO	DB	Site Visit
Concerned Party:		Anonymous						
Concern Info:		states "Business appears to be periodically spraying a chemical substance with overhead doors open, creating exposure to nearby properties. This exposure has created incidences of headache and nausea with those inhabitants."						
Conclusions:		Drove by, no visible spraying, minor skunklike odors. Facility representative stated they periodically spray pesticides and a sulfur compound inside not visible from outside. At loading dock most days after harvest they power wash. I observed no issues of concern.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58572	7/24/2024	7/26/2024	IsoNova Technologies	Odor		SWRO	JW	Phone Conversation
Concerned Party:		Laura Hazelwood						
Concern Info:		Laura Hazelwood called to report strong odors wafting out of the IsoNova Technologies facility from 7/21/2024 to 7/24/2024. Hazelwood drives past the facility on P Highway daily around 8am. Hazelwood states that the odors are worse than they have ever been. Hazelwood is a local resident.						
Conclusions:		SharePoint #10347						
		I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58581	7/24/2024	7/31/2024	Jeremy Pitts	Other	Warsaw /Benton	KCRO	JH	Letter UF
Concerned Party:		Anonymous						
Concern Info:		CP reports that RP collects hundreds of tires over the year and then burns them each fall around September. The tires are stored at the back of the property. RP also owns the field behind the shop, and I believe this is where the tires are stored according to the CP.						
		CP advises that the owner may be dangerous and to bring police.						
Conclusions:		Violations were observed and an Unsatisfactory Findings letter was sent requiring a response.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58582	7/25/2024	8/1/2024	Cornelius Wrecking	Asbestos	St. Joseph /Buchanan	KCRO	CK	Phone Conversation
Concerned Party:		Andrew Madget						
Concern Info:		A 10-plex was recently demolished after being damaged by fire. The building has since been demolished. The concerned party believes this was done without notification. Alternate Contact Kody Cornelius 723 S 8th St St. Joseph, MO 64501 816-596-3362						
Conclusions:		The demolition of this structure was mistakenly assessed as qualifying for the residential building exemption. I confirmed with the asbestos unit that the contractor had discussed this project with the department prior to demolition, but the number of dwelling units was not confirmed. The contractor was advised of the error. Further information on the residential building exemption was provided to assist in preventing future violations.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58585	7/23/2024	7/23/2024	Robert Quarles Sr.	Asbestos	Kansas City /Jackson	KCRO	MC	Referred to Other Agency
Concerned Party:		Aaron Weissenfluh						
Concern Info:		This building had a sewer collapse outside the building forcing raw sewage through the building 7 March 2024. The building owners initially refused to fix the issue so after a week, the toilets backed up again after a large rain storm 14 March 2024. Upon cleanup, asbestos floor tiles were disturbed and broken. Air handling units were installed temporarily to dry the floors and walls. The asbestos was not removed or sealed to prevent further release of asbestos when remodeling. The owner covered the asbestos tiles, including the broken and loose tiles with carpet. When we notified the landlord and his son, they told us to stop tearing up things that don't need to be torn up. We have since moved from that office due to the safety concerns and their refusal to correct the situation. I've attached photos of the main space, the asbestos report and the email we sent to them and the response. The address listed on the asbestos report is my home address. We still have one sample of the tile remaining in our possession. (Note: message from EPA did not include any of the mentioned attachments.)						
Conclusions:		This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58589	7/25/2024		Jerry Archdekin, Developer	Other	St. Joseph /Buchanan	KCRO	CK	
Concerned Party:		Anonymous						
Concern Info:		A development site at 2034 Karnes Rd (or 380 N. 18th Street) in St. Joseph has hit some unwanted rock and is crushing and selling the rock. This process is creating a lot of dust and the CP also questions whether this site has a permit for the portable crusher. Also if this site is over an acre they would need a land disturbance permit. It is believed that the business name of the developer is Archdekin. Clerk at the Building Department in St. Joseph stated that there was a Land Disturbance Permit associated with that property from 2021 and that it was no longer current and provided the name of Jerry Archdekin and a telephone number. A call was placed to the St. Joseph building department with questions regarding this property. A land disturbance permit had been issued in 2021 to a Jerry Archdekin as the developer. But clerk at the building department seemed to think that permit was expired.						
Conclusions:								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58593	7/26/2024	7/26/2024	Kyle Miller	Odor	Mercer /Mercer	NERO	DB	Other
Concerned Party:		Anonymous						
Concern Info:		Online report states strong or offensive trash odors from private residence						
Conclusions:		No violation alleged - odor rule is not enforced on a private residence						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58608	7/26/2024	7/26/2024	Liberty Utilities Venice	General Water Quality Odor Inquiry or Response to News Story or Media Posting	Rockaway Beach /Taney	SWRO	MW	Other
Concerned Party:		Victoria Johnston						
Concern Info:		bruce.robinson@libertyutilities.com The concerned party states that they have been on and off of a boil advisory since Liberty Utilities had taken over 5-6 years ago. The water is discolored and has a smell in addition to these advisories being posted along the concerned parties street. In April, they had a very high utility bill- over \$600- that they would not explain, and utility bills over \$100 since then. They are concerned with the water quality of their drinking water.						
Conclusions:		SharePoint #10381 No further action needed. Concerned party has been informed of the most recent boil advisory and what we can and cannot regulate. Also see Concern 10382.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58609	7/27/2024	7/27/2024	Larry Wald	Odor	Carthage /Jasper	SWRO	JW	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		Concerned party first noticed issue on January 1, 2024. I live in Heritage Acres. There has been an odor similar to fertilizer or animal waste for several months. At times it is bad enough that I cannot sit outside. It can be smelled in Carterville and in Webb City depending on the wind/weather. At times it is so bad on HH highway/Fir Road near the Carterville City Hall that you cannot have your windows down. I know that there have been multiple complaints made but nothing has been done. I do not know who is responsible for creating the odor.						
Conclusions:		SharePoint #10395 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58616	7/28/2024	8/9/2024	Randall Scritchfield	Open Dumps Open Burning	Forsyth /Taney	SWRO	CR	Site Visit
Concerned Party:		Joe Reynolds						
Concern Info:		Dumping and preparing to burn mattresses and miscellaneous trash on Liberty Utility lake shore property! First noticed on July 28, 2024.						
Conclusions:		SharePoint #10393. No open burning violations were observed at the time of the visit. Open burning information and PUB2047 were provided.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58618	7/30/2024	7/30/2024	Dusty	Asbestos	Cainsville /Harrison	NERO	DB	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		"We have A two-story brick building next to the main intersection that it's roof collapsed the spring. Three sides of the building are slowly falling in. However, the home owner says it's none of our business when we ask if they're taking it down. This is a major liability to kids riding their bikes, cars going by, tractors trucks anything driving at that intersection. What can we do?"						
Conclusions:		No violation alleged. Called city hall & left message to offer info.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58624	7/30/2024	8/9/2024	Randall Scritchfield	Open Dumps Open Burning	Forsyth /Taney	SWRO	CR	Site Visit
Concerned Party:		Joe Reynolds						
Concern Info:		From Email: "Dumping and preparing to burn mattresses and miscellaneous trash on Liberty Utility lake shore property! "						
Conclusions:		SharePoint #10414. No open burning violations were observed at the time of the visit. Open burning information and PUB2047 were provided.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58629	7/29/2024	7/30/2024	Wards Recycling	Open Burning	Windsor /Henry	KCRO	CK	Site Visit
Concerned Party:		Anonymous						
Concern Info:		From Webform - Burning of hazardous material. Approximately an acre sized area. Southwest corner of the property.						
Conclusions:		Dave Ward, the owner, stated that the fire started on accident. At this time, no violations will be issued, but a compliance assistance letter will be issued with information on different solid waste and open burning requirements.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58632	7/26/2024	7/31/2024	unknown	Odor	Hallsville /Boone	NERO	BH	
Concerned Party:		Anonymous						
Concern Info:		Via email, "13823 N. Frink Rd Hallsville MO. The lagoon is failing. The stench is horrible for miles around. sewage is just sitting there rotting and not being treated."						
Conclusions:		I contacted Sarah Carol with the Boone County Health Department environmental unit. I explained the concern to Sarah. I told Sarah that DNR does not regulate a single-family lagoon operational aspect of water or air. We were referring this to the department of health. This is not regulated by Missouri DNR						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58636	7/30/2024	7/30/2024	Michael J Hagan	Asbestos	Hannibal /Marion	NERO	DB	Phone Conversation
Concerned Party:		Jeremy Herring						
Concern Info:		Via email, "Address of the property in question is 534 Riverside st, hannibal MO. A neighbor and new owner of the property, Micheal J Hagan, has been told the now exposed siding of the house is asbestos material. His verbal response was that he just needed to put it in 6mm thick bags and dispose of it with regular waste. I'm a former HAZMAT technician and know that not to be the case and why I am reporting the issue in search of help in trying to make sure any further exterior work is handled properly. He already has disturbed the surface and thrown siding material in not only the current dumpster located at the property now, but some in a previous one also. The houses on our street are in close proximity to each other and further disturbing the material poses and health and safety issue to rest of the residents. I'm not sure what laws or regulations can be applied in this instance to get some testing done to verify the material and create a proper and safe removal process from this point on. "						
Conclusions:		No violation alleged, discussed with concerned party.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58640	7/19/2024	7/19/2024	Missouri Eastern RR	Fugitive Particulate Matter		SLRO	RA	
					/Franklin			
Concerned Party:		J.D. Kelley						
Concern Info:		Tate Kitchell recieved an email from J.D. Kelley. The CP states Tate, the sunlight this morning was beautiful through the dust escaping the transload operations on Washington Ave. What is the best way to report these issues – they continue daily. Thanks."						
Conclusions:		7/19/24-TKK- Responded to J.D. Kelley's email and copied Robert Andrews.						
		7/24/24-RLA- I spoke to J.D. Kelley and told him the DNR is well aware of the situation at Missouri Eastern Railroad (MER) and that we have issued a referral notice of violation and a subsequent violation. J.D. was satisfied with the response and will call us if he has any additional questions.						
		Missouri Eastern Railroad has been referred to enforcement for fugitive dust violations and has been recently cited with additional violations.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58641	7/23/2024	7/23/2024	Unknown	Odor		SLRO	PG	
					/Jefferson			
Concerned Party:		Heather Hart						
Concern Info:		Recieved an odor concern from the I-70/270 Area Odor Complaint Website. The CP states, I started smelling a Manure or Farm Animals, Rancid or Rotten, Sewer odor at hwy 141 and Old Lemay Ferry Road this morning on my way to work.						
Conclusions:		7/23/24-MCL- There do not appear to be any solid waste sources near this location.						
		7/24/24-PXG I left the concern party a voicemail that informed her of the actions I will take, and indicated that I would like to talk to them to see if there is any more information. I evaluated DNR records and Google Earth to see if there were any suspect sites, and could not find any.7/26/24 - PXG I investigated the intersection of 141 and Old Lemay Ferry Road, and drive down Old Lemay Ferry Road and 141 with the windows down in the suspect area. I stopped to observe several storm water retention ponds that a sewer odor was emanating from. I also spoke with the local sewer district who were in the area investigating as well. The sewer district indicated the smell was from organic matter flooding the system during the extreme rain the region has bee expeirancing. The odor was not detectable in any dilution ratio, and therefore not a odor violation. I left the CP a voicemail relying this same information.						
		Odors were not detectable above the 7/1 threshold. The odors appeared to be from organic matter flooding the system during the extreme rain the region has bee experiencing.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58642	7/17/2024	7/22/2024	Unknown	Odor		SLRO	HH	
					/St. Louis City			
Concerned Party:		Randall Hansen						
Concern Info:		The CP indicated that there is a medical/chemical smell occurring in/around his building. The smell typically starts after 5:00. I stated to the CP that we will not enter the building to evaluate the odor, however we can investigate the area for industrial sources. Additionally we can inform the CP if the odor is picked up on our nasei ranger outside of the building. I gave the CP the contact to the Citizens Service Bureau, and the CP indicated the gas company had already been called. The source of the concern is near some of the sites in the south city odor loop.						
Conclusions:		7/17/24-RLA- I looked up the address and we have not had a concern at this property before. This facility appears to be in the area where we get the South St. Louis Odor concerns.						
		on 7/22/2024 about 9:45 AM I drove on Lafayette Avenue from Jefferson to Grand Avenue and stopped at different locations, I did not smell any odor.						
		No odors were detected during the investigation.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58643	7/21/2024	7/24/2024	Unknown	Odor	/St. Louis City	SLRO	LZ	
Concerned Party:		Alison Carter						
Concern Info:		Recieved an odor concern from the DNR website. The Cp states there is a strong gasoline smell throughout south city (shaw neighborhood).						
Conclusions:		<p>I called the CP before I let to visit the area to find out if the odor is still there. There was no answer to my call. I visited the concern location on the 24th of July 2024. I parked my car in front of the CP house. I called the CP to get more informant about the concern. .My phone call was not answered. I left a message. I walked up and down the street. There was no gasoline smell at shaw neighborhood as stated by the CP that I could smell. I called again at the end of my visit to let the CP know of my findings and left a message.</p> <p>No gasoline odor at the shaw neighborhood at the time of my visit.</p>

Concerned Party:		Don Norfleet						
Concern Info:		Caller has contacted EPA who forwarded them to the Health Department with no help. So they contacted their legislator whom told them to contact DNR. The issue started 9/23 when the Smith Hale Junior High School was demolished. The abestos, tile was put in dump bed and B blasted into the air. The covered pipes that had abestos was put in shipping containers and b blasted and hauled away. They asked the contractor where were they hauing and they would tell. That is when they contacted the Health department and was told everything is fine. When originally blasted the dust flew over the football field and bushes. The field is artificial turf. There was a thick white coating. They have been trying to get help or someone to test since September 2023. Caller would like to be contacted.						
Conclusions:		I reviewed the project with the delegated local agency, Kansas City Air Quality Program. They have been to the site on multiple occasions have have not found any violations. Project has been completed.

58738	7/9/2024	7/30/2024	Russell Farrah	Open Burning	/Lincoln	SLRO	RB	
Concerned Party:		Anonymous						
Concern Info:		Spoke with the CP about a property at 100 N Ethlyn Rd, Winfield MO. The CP claims that the AP (alleged party) is Russel and Bonny Farrah. According to the CP, the AP are heavily on drugs and maybe violent. They have restarted open burning of materials that give off an offensive odor. The burning is taking place in a smoker, so the CP cannot see what materials are burning but stated that "it definitely cannot be wood with the smells coming from the fire". The AP burns multiple days, at all hours. The CP has noticed the smell heavily around lunchtime. The CP contacted the fire department earlier in spring regarding the burning but does not believe the fire department did anything about the issue. The AP is supposedly the son of the property owner, Randy Farrah.						
Conclusions:		<p>7/15/24 I conducted a site visit to determine what item was being used for potential open burning. It was deemed to be indeed a smoker on the corner of the property, but no burning was occurring. I did not see or smell smoke. Later that same day I emailed the owner as this is the second concern I have been assigned at this address. Farrah responded with alertness to the issue and stated he would have the smoker moved, but was unaware it was even on the property. He mentioned he would respond back to me when it was moved.</p> <p>On 7/30/24 around 1 pm I traveled to the concern site. The smoker has been moved and no open burning was present.it would appear the issue has been resolved for now. It was never clear if any improper burning was occurring in the first place, but because the owner was willing to work with us and have it moved from that edge of the property, we were able to make some progress in the matter.</p> <p>I visited the site on 7/30/24 and I did not find any open burning violations at the time of my investigation</p>

Concerned Party:		Patrick Lefarth						
Concern Info:		<p>Suzanne Lamb recieved an email from Patrick LeFarth. The CP stated, "I wanted to update you that again today 7/22/24 that they are still burning, producing a yellowish smoke. Even with the use of sprayers, the noxious smoke is drifting several directions due to the changing winds, and causing various symptoms in people surrounding the area. I've spoken with several others who are concerned for their safety and health. I've informed them about how to report this and encouraged them to report to several different agencies. We're all hoping that changes will come soon so we can comfortably work around the area again."</p> <p>On July 30, 2024 Patrick Lefarth emailed "they are burning again"</p>						
Conclusions:		<p>7/22/24 SEL - I spoke with Daniel Reed and Robert Barnacle about plans to investigate the facility on 7/30/24.</p> <p>7/30/24 SEL - Robert Barnacle and I conducted an investigation of the facility around 9:10am. We arrived at Branch Street and parked adjacent to the Kiesel Company and Advantage Metals Recycling. We were able to walk roughly a half mile up the McKinley Bridge Bikeway, and position ourselves approximately 50ft above and 400ft east of the facility. Torch cutting was being conducted, and smoke emissions were noted.</p> <p>At the time of the inspection the facility had two spray misters operating, Even with the misters, smoke emissions were still prevalent. Obnoxious odors were noticed as well. Due to the conditions presented from the spray misters I was not able to perform a Method 9 observation. The facility currently has outstanding compliance issues, and is working with SLRO and APCP. A site visit is being arranged with myself, Robert Andrews, Daniel Reed and SA Recycling.</p> <p>The facility currently has outstanding compliance issues, and is working with SLRO and APCP to find a solution.</p>

Concerned Party:		Anonymous						
Concern Info:		CP reported a fish kill on the lake at City of Houston Lake. CP stated they heard about the fish kill on the city's web page Tuesday August 6th, 2024. The CP was concerned and drove by this morning. The CP observed dead fish along the dam on the south side if the lake. The CP stated they saw dead fish along the shore long east and west of the dock. The CP stated they saw a few hundred fish and there was a strong odor of fish. The CP stated there was green mossy stuff around the dock but not along the bank. The CP though some of the dead fish were sunfish, catfish, and maybe a bass, then some smaller minnows. The CP also stated there was some excavation going on at the north end of the lake on the peninsula around City Hall and near the upstream silt pond. The CP was not sure what the work was for but it has been ongoing for about 6 months.

58785	8/12/2024	8/12/2024	Rachelle Shaw	Open Burning	Neosho /Newton	SWRO	CR	Communication In Person
Concerned Party:		Anonymous						
Concern Info:		Caller states that responsible party is burning in the evenings about once a week. There are several trucks (tractor trailers and flatbed trucks) that bring in waste products to burn. The smell is vile and it is a slow, smoldering burn. The fire department is not interested in assisting.						
Conclusions:		<p>SharePoint #10606</p> <p>I arrived at the property at 1:55 p.m. and spoke with property owner Rachelle Shaw. I informed Shaw that the department had received a concern related to open burning on the property and asked if they conduct any burning on site. Shaw confirmed that they burn animal waste from their 8 cows and hay scraps before using the waste around the property. I followed Shaw to the burn pile and confirmed that the items burned included only animal and vegetative waste. When I inquired about the concerned party's claim that trucks were bringing in waste products for burning, Shaw stated that she recently had a new shipment of hay, but nothing is brought on the property for the purpose of burning. All of Shaw's statements aligned with my observations including a new shipment of hay, the contents of the burn pile, and the volume of the burn pile. I informed Shaw that I did not observe any violations and thanked her for her time. I left the property at 2:07 p.m.</p> <p>Responsible party burns animal and vegetative waste produced by the animals and activities on the property. No violations were observed and no further action is required.</p>

58808	8/1/2024	8/2/2024	Alice Faye Parks	Open Burning Residential	/Jefferson	SLRO	RB	
Concerned Party:		Scottie Aims						
Concern Info:		Spoke with the CP about an issue with a neighbor (3707 East Four Ridge, Imperial MO) burning trash. The AP burns around 2 trash bags every other day in a burn pile. The AP does not have trash service, and instead burns their trash for disposal. The CP wanted information regarding this practice. I told the CP that under DNR regulations, a person can burn their own household trash on their property, however, it is not recommended. I stated that the CP can call Jefferson County Services, and that the open burning of trash was prohibited by county services, but we will still send an inspector out to the property to assess the situation. The CP stated they have already submitted a concern about this issue, and felt that the issue was not addressed. The CP has asthma and is being overwhelmed by the smoke. The fire department has been called multiple times on the issue, and has given varying advice and information. Following the phone call I emailed the CP fact sheets and Jefferson County Services information.						
Conclusions:		8/2/24-RLA- Tate had recently completed an inspection at this property on 7/18/24, Sharepoint # 10215 and Jefferson County Div of Solid Waste was informed that trash was being burned.						
		8/5/24 RPB - I called Jefferson County Div of Solid Waste. They visited site on Friday 8/2/24 and stated the burn barrel was empty, but RP told JeffCo, RP typically only burns paper waste. Someone from MO DNR told RP they could burn trash per state rules, but Jefferson county told RP they can't burn trash and gave RP a list of residential trash haulers. No violations noted.						
		Jefferson County Division of Solid Waste was contacted. They had performed an inspection on 8/2/24 and they did not find any open burning violations.

58809	8/2/2024	8/2/2024	Private Residence	Open Burning	/Jefferson	SLRO	RB	
Concerned Party:		Rebecca Garner						
Concern Info:		SLRO recieved an open burning concern from the EPA. The CP states: The people at 3707 east four ridge rd burn all thier garbage from the inside the house every other day along with sticks and small yard waste to cover up the fact that they are burning plastic. The garbage bags themselves are plastic. I cant be outside on my front porch or have my windows open. Nevermind, I cant breathe. Please contact me to let me know what can be done.						
Conclusions:		8/2/24-RLA- This is the third concern we have recieved about this property in the past month. See Sharepoint 10462 and 10215. Tate last visisted the property on 7/18/24.						
		8/5/24 RPB - I called Jefferson County Div of Solid Waste. They visited site on Friday 8/2/24 and stated the burn barrel was empty, but RP told JeffCo, RP typically only burns paper waste. Someone from MO DNR told RP they could burn trash per state rules, but Jefferson county told RP they can't burn trash and gave RP a list of residential trash haulers. No violations noted.						
		Jefferson County Division of Solid Waste was contacted. They had performed an inspection on 8/2/24 and they did not find any open burning violations.

58810	8/9/2024	8/9/2024	Unknown	Odor	/St. Louis	SLRO	RA	
Concerned Party:		Autumn Taylor						
Concern Info:		Recieved an odor concern from the DNR website. The CP states We have been having a sewer smell come into our apartment from both the toilet and the HVAC. We have submitted several maintenance requests to no avail. The management doesn't seem to be taking the issue very seriously. I'm not sure what to do as the smell keeps coming back, and even if it could be covered up (no luck so far) if it is sewer, then it should be addressed at the source. What can I do?						
Conclusions:		8/9/2024 - RLA- I called the CP and left a voicemail.						
		MDNR does not regulate indoor air. I referred the concern to the St. Louis County Department of Health.

58811	8/12/2024	8/13/2024	AZZ Galvanizing	Hazardous Air Pollutant Release Particulates	/St. Louis	SLRO	RA	
Concerned Party:		Larry Fry						
Concern Info:		08/12/2024 - Spoke with Larry Fry he is the concerned party. He is stating that a company called AZZ Galvanizing is polluting the air with Galvanized Metal dipping emissions. He said that you can see fumes leaving the property. He said that it happens intermidently throughout the day when they are dipping the metals. He said he has spoken to St. Louis County regarding it and they will do nothing about it. He also said that he has spoken to an EPA investigator at one point, but, could not recall his name. He said he rents properties around the area and people are having to move out because the fumes are so overwhelming. He said that he would like communication and feedback on this concern. He said that this has been ongoing for years.						
Conclusions:		This facility resides within St. Louis County. Referred the concern to St. Louis County Department of Health.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58828	8/14/2024		Mark Baird	Open Burning	/Jasper	SWRO	CR	Other
Concerned Party:		Jacob Good -Fire chief, Jasper Fire District						
Concern Info:		City of Jasper pushed up a building into a pile and set it on fire. It contains roofing and a number of various items that should not be burned. Also some types of aerisol cans can be heard going off. Not sure if there is asbestos in the debris. Jasper Fire Chief has pictures of the burn.						
Conclusions:		SharePoint #10651. No open burning violations observed. No further action is required.

58834	7/31/2024	8/6/2024	Crocker PWS	Odor	/Pulaski	CFO	RB	
Concerned Party:		Tiffany Hooper						
Concern Info:		An online concern form was submitted to DNR with the following information "Hey there! I am located in Crocker Missouri and we recently moved into our new home 2 months ago. Ever since we moved in we have been dealing with a rotten egg smell filling our home. At first it was happening once a week but now it is happening daily. It smells horrible. I have contacted our city hall several times and was told that they are just waiting on the go ahead from DNR to switch to chlorine base systems, which should solve our problem permanently. But until then all they could offer was flushing the water lines. I am hoping you could help shed a little light on the situation and give me some good news on when we should stop having to deal with this horrible smell? Thank you so much! "						
Conclusions:		I spoke with Tiffany about her concerns and filled her in on the chlorination project the city of Crocker has been working on and that chlorination should address the odor issue. In the mean time, I suggested having her hot water heater drained and cleaned. I told her if the odor is still an issue in another month or so, to please give us another call.

58864	8/8/2024	8/15/2024	Moniteau County Courthouse	Asbestos	California /Moniteau	NERO	DB	Phone Conversation
Concerned Party:		Anonymous						
Concern Info:		<p>Concern submitted online states: Date first noticed April 1, 2024</p> <p>Orginal radiator/radiated heaters were removed from within the 1800s Courthouse and replaced with modern HVAC; however, the general contractor, Drinkard Construction, is not a licensed asbestos removal company. The Courthouse was not shut down for business during the replacement time frame, which started Spring 2024. The Courthouse never had an asbestos washing station/tent set up as waste and materials were being removed. Based off the age of the Courthouse, 1800s, it's likely that asbestos was present during the construction project. No precautions seemed to have taken place to protect employees and any members of the public within the building during the removal process. The materials were hauled off by an unknown source; therefore, it's unknown if said waste was properly disposed of after removal. County Commissioner, Clint Hoellering, appeared to be the lead on the project.</p>						
Conclusions:		<p>No violation was found during the investigation. Called courthouse, spoke with clerk. I informed her of the concern and she said they have had no remodeling of the heating system since months ago. I reviewed the file and found a DNR inspector had previous contact at this site due to a lead paint concern and an asbestos inspection report had been added to the DNR file at that time. The report showed inspection of the items identified by this concern and noted they did not contain asbestos. Fiberglass and blown cellulose insulation was found. See ACE 57768</p>

58943	7/22/2024	7/23/2024	Mobile Home Salvage Yard	Open Burning Open Dumps	Troy /Lincoln	SLRO	MC	
Concerned Party:		Anonymous						
Concern Info:		Anonymous concerned party called about a mobile home salvage yard-like business that is openly burning parts of the mobile homes that cannot be scrapped. There is a constant rotation of burning materials with large plumes of thick black smoke. The concerned party would like to remain anonymous but mentioned they'd like to call back to hear an update on the matter. They are willing to provide photographic evidence if needed when they call back. Per Missouri Assessor and Property Directory the two properties (44 & 54 Snyder Rd) are owned by a Beverly Jean Swan.						
Conclusions:		7/22/24-RLA- I looked up the address and we have not had a concern at this location before. I looked at the satellite images and it appears most of the site should be viewable from the road or from neighboring parking lots. There is evidence that open burning have taken place on the property, but nothing could be identified in the burn pile. This is the sites first open burning concern with our department and a violation could not be explicitly determined based on evidence during the site visit. A compliance assistance letter with regulations and fact sheets will be sent to the SoC mailing address as identified in parcel viewer. The Department will investigate any further environmental concerns from the property. 8/14/2024 MSC: I visited the site at about 11:00am. The property had a gate that was locked and there were no persons active at the site to speak with. From outside the gate (north entrance) I could see a pile of rubbish containing a box spring mattress and furniture in the southwest corner of the property. Directly to the left of the rubbish pile three were scorch marks roughly 1-2 feet away. The proximity of the burn pile to the rubbish pile shows evidence that durable goods and treated wood are being burned on the property. However, the burn pile was completely spent, and no items could be identified.

58944	7/29/2024	7/31/2024	Tenants on property	Open Burning Open Dumps	Troy /Lincoln	SLRO	KH	LOW
Concerned Party: Matthew Knight (and anonymous)								
Concern Info: CP calling in for property owner states that residents living at 485 Hardy Road in Troy are burning and burying trash and scrap tires. Cutting up cars and burying them. CP states filled up a pond with trash and scrap tires and covered it with dirt. So now neighboring property is flooding. CP contacted the homeowner and had no resolution because homeowner lives out of state. CP recommends contacting the local police as an escort for site visit. Stated that the tenants that live on the property are aggressive and there is potential drug activity.								
Conclusions: 07/31/2024 - Kathleen Hertling and Shannon Hambrick performed a site visit of a potential open burning and dump site. While on location we met with a man and asked him if he knew anything about the concern that we were looking into. He said that he did not because he had only been there a couple of days and was leaving. He initially refused to give us his name and then stated that it was John. He gave us permission to look on the property for the issue. After walking the property we saw the dump site, there was no open burning, but, there was a solid waste concern in the form of a huge dump site near a dry pond. While taking photographs of the dump site we met with a woman named Lori Martin (636) 297-5954 who gave us some information on the owner of the property who hired a man named Vance Retcher to take care of the dump site and she told us that he was instructed to dump the items and bury them. We also learned from her about another potential party involved and his name was Randy Ashoff (636)318-2946. The area of concern could potentially be the site of illegal activity so proceeding with caution is necessary. This concern is being handled by Shannon Hambrick for the remainder of the follow up as there was no open burning occurring.								
- 7/31/24 SJH - After 4 pm, Winifred Selle (owner of the property) called regarding Kathleen and my visit to her property. She stated that she did not ask Vance to fill in the pond, that it had been dry and was really just a depression. Ms. Selle stated that she lived @ 4307 Sugarleaf Ct., Virginia Beach, Virginia 23462 and that she was renting to Mr. Retcher. She stated that she didn't know John, but that Mr. Retcher had mentioned that a friend would be on site for a short time. Ms. Selle stated that the neighbor across the street was being unreasonable and that they had an ongoing dispute over migrating water from her property. She stated that Mr. Retcher had relayed an incident between he and the neighbor in which the neighbor brandished a firearm. This is the opposite from the story that Lori Martin told us. She had stated that Mr. Retcher had brandished the weapon, during an argument with the neighbor.								
Ms. Selle stated that she was "in town" and had told Mr. Retcher that he needed to clean up the solid wastes dumped on site. She stated that due to extenuating circumstances, the clean up had been paused. I told her that I would be sending her literature on the matter and that I was responsible for the site until it was cleaned up.								
- 8/9/2024 SJH - Received a call from Joe Martin that the "person living in the cargo trailer" was burning mattresses and maybe tires. I called Winifred Selle and left a message for her to have her renter stop burning furniture/tires, immediately.								
2:45 Received a return call from Ms. Selle. She stated that she would go to the property to check on the fires status.								
3:30 Ms. Selle called to state that no mattresses/tires were being burned on site. She sent a picture of the burn pile w/o signs of metal remnants (mattress springs or tire wires). Ms. Selle asked that I provide information for the closest transfer station/landfill. I told her that I would email her the information and that I would text her to let her know that I had done it. (Sent information and text)								
08/01/2024 - Open Burning was not observed during my site visit.								
8/1/2024- Solid Wastes were being illegally dumped on site. Investigation will continue. Winifred Selle has responded. I will send her a letter to begin the clean up process.								
8/12/2024 - LOW sent to Ms. Selle and Mr. Retcher

58946	8/12/2024	8/13/2024	Mike & Amanda Melton	Open Burning Open Dumps Drinking Water Well	Troy /Lincoln	SLRO	MC	
Concerned Party:		Mike Kelley						
Concern Info:		08/12/2024 - Spoke with concerned party Mike Kelley. He said that there is a company called All Star Junk Removal owned by Mike & Amanda Melton who are hauling trash back from customers and taking it back to their house and burning it. Mike said that there is every kind of item being burned from plastics, styrofoams, couches, and etc. He said that he will be sending over pictures of what has been put into the fire. He called the county and stated that they won't do anything about it. Mike said the air is so thick with smoke that you cannot breathe. He also mentioned that he is worried this debris being burned is affecting water quality within their wells.						
Conclusions:		<p>8/13/24-RLA- I looked up the site address and we have not had a concern at this location before. I looked up the site on satellite imagery and the site appears to be a residential house.</p> <p>For initial action the DNR will be sending Compliance assistance letter, fact sheet(s), and excerpt of 10 CSR 10-6.045. The CP will contact the office if open burning continues.</p> <p>MSC 8/14/24: I visited the concerned party at the home to talk about the concern and gather more information. The source of concern (SoC) is located at 199 Lamonda Estates runs a Junk removal and dumpster rental service out of their home address called All Star Junk Removal & Dumpster Rental. The CP alleges that the SoC is burning junk received from customers. Photos were provided by the CP They told me that Lincoln County Fire & Rescue had responded to a fire on Sunday August 11, 2024. I left the CP's home and drove along the road to see if could see the burn pile from the road, there was no active burning visible. I could not see the pile from the road but saw another neighbor and chatted about the concern. It was expressed that the SoC had gotten into a physical altercation that neighbors were witness to. I gave this person my card and recommended that they call the fire department for any concerning burns and to encourage them to include specific items burned in their incident report.</p> <p>I then visited another neighbor's house on my way up the driveway to knock on the door I was able to see a spent burn pile (document set) . This burn pile appears to be in the location as the the photographs taken by the CP. The burn pile was spent and I could not make out any specific items.</p> <p>I decided that due to the information about the SoC's physical altercation, and the evidence I was able to gather, I would not attempt to enter the SoC's property or make contact. I went back to the CP's home to talk about my findings and inform them that I would attempt to get the incident report from Lincoln County Fire.</p> <p>MSC 8/14/2024: I received the Incident Report from Lincoln County Fire (attached). There were not specifics identified in the report.</p> <p>MSC 8/23/24: I spoke to CP to inform them of my next steps since the incident report route would not suffice. A compliance assistance letter containing no names concerned parties would be sent to the SoC outlining that the alleged materials burned are a violation of open burning regulations. Facts sheet(s) and an excerpt of the regulations would be enclosed. The CP stated this action would be acceptable. I told them that if the burning continues after the letter is sent to call the fire department if concerned about the materials being burned and to call our office for further investigation, I provided my contact information.</p>

58951	8/6/2024	8/7/2024	Left Hand Promotions company	Odor	/St. Louis City	SLRO	LZ	
Concerned Party: Anonymous Concern Info: The caller stated the odor coming from Left Hand Promotion, a T shirt printing company locateda at 2400 Jefferson is giving people in the area headaches. Conclusions: I visited the site on the 7th of August 2024. I met the Site Manager. I explained the purpose of my visit. I walk through the facility. Left Hand Promotion is a T shirt printing company. The ink used for printing is water based. The T shirt printer is vented outside. I walked outside at the back alley. What is vented is heat fumes collected at the time of printing. There is an office to the east side (by the alley). There was no odor that I could detect there either. No violations noted at the time of my visit.								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
58952	8/9/2024	8/16/2024	Precoat Metals	Odor	St. Louis /St. Louis City	SLRO	RB	
Concerned Party:		Natalia						
Concern Info:		Recieved an odor concern from the DNR webpage. The CP states "Hello, today is the second time I have noticed a strong odor in my neighborhood. It smells acrid and bitter and it's unlike any other smell that is familiar such as burning oil, trash or firewood. I cannot pinpoint exactly where it's coming from but it is strong enough to enter the house when all doors and windows are shut. Since it has happened before I decided to make an alert, it is extremely unpleasant. This is a residential area and I do not know of any industrial plants that could have an impact. "						
Conclusions:		<p>8/9/24: I visited the site around 1:30 PM and smelt an odor that was coming from Precoat Metals. I walked in and met the EHS manager Derek Walker. We sat down with the plant manager and I asked if there was any misfire or emissions problems. They stated it was business as usual and no unusual occurrence happened. The fire dept did show up around 7 AM as well and used their gas and radiation detection to found 0 on their monitors. We walked the plant and went outside and I saw zero opacity, but the smell was strong. I had come from a previous inspection so I did not have the nasal ranger. Walker showed me that the furnace was at 1437 degrees and should be above 1400 degrees at all times. He also stated that they have an alert systems when the temperature drops and have not had any alerts. He also stated that the efficiency for the destruction of the VOC's was above 98%. Walker has gotten odor concerns before from neighbors over on 39th st and walked over with a Dräger X-am@ 2500 that detects O2, CO, NO2, SO2 and H2S, and found 0 problems on that street. Although the odor exists, it may not be a violation. As I was driving away I noticed a family walking on the street and asked them about the odor. A man said he smells it almost daily. I gave him my card and told him to call me if he finds the smell to be unbearable.</p> <p>8/16/24: I visited the site with a Nasal Ranger. I conducted an odor test, but found there to be no odor present. I called the EHS manager Derek Walker to let him know the results and emailed the CP again. I did not get a response from the first email I sent the CP. No visible opacity was coming from the facility either.</p> <p>A strong odor was present and was coming from Precoat Metals facility. The odors did not exceed the 7:1 Odor threshold, therefore no violations were found during the inspection.</p>

59008	8/8/2024	8/8/2024	Backridge SLF	Sanitary Landfills Odor	La Grange /Lewis	NERO	WP	
Concerned Party:		Glenn Schroder						
Concern Info:		On August 8, 2024, the Northeast Regional Office received a concern stating that Backridge SLF is not covering the working face, which is causing strong odors. The caller also stated that the landfill is out of air space, so they are filling unpermitted areas. The caller then stated that the facility is accepting particularly odorous loads and they are not covering. The caller stated that the odors are especially bad when winds are out of the north. The caller then demanded that NERO staff investigate today. I told the caller that NERO staff could not investigate today, however, NERO staff would follow our procedures and investigate within five days. I then explained that we would be unable to document the facility not placing adequate cover in the middle of the day and would need to visit the site when they first open to document inadequate daily cover. The caller then asked if we would investigate today if there was a fire. I confirmed that department staff would visit the same day if there was a fire. The caller then stated that the whole working face was on fire and there was smoke everywhere. The caller then demanded that NERO staff call the landfill today to inform them of the concern. I told the caller that I would consult with my supervisor and follow their direction. The caller then stated that they would like a call from my supervisor.

59067	8/14/2024	8/14/2024	Green Hills MHP	Asbestos Open Burning	Columbia /Boone	NERO	SB	
Concerned Party:		Anonymous						
Concern Info:		Caller reports that new owners of Green Hill MHP in Columbia have been demolishing mobile homes and are burning construction/demolition debris from the project. Caller stated that approximately 10 to 15 mobile homes have been demolished and most of the waste was placed in a dumpster. The open burning began yesterday (August 13).						
Conclusions:		Issue Notice of Violation to IPM Investments and to P&H Construction and Remodeling, LLC for open burning and asbestos failure to inspect and notify violations. Require an inspection of demolition debris and notifications after the fact of the demolition.

Concerned Party:		Anonymous						
Concern Info:		On August 9, 2024, Cecilia Campbell call to report a concern she received. Concerned party stated that the owner of "Heartland Medical Disposal" is picking up medical waste and incinerate the waste without a permit and is dumping the waste on their property. Cecilia told me that she believes that David Fenton came to the WMP office to discuss but has not been heard from sense. Cecilia said the potenial name for the responsible party is David Fenton. There was an ABC News artical regarding a scamming operation he was apart of. Google earth shows a pile of waste on the north side of the shed/garage on the property. Website found below https://heartlandmedicaldisposal.com/ The website identifies Michell Alderson and Trevor Hill as team member.						
Conclusions:
